MirTac: optimise your Fleet Management

Business Process (Re)Design in the maritime industry

Optimise your business with MirTac's Business Process Redesign. We will analyse your business processes (from finance to IT), evaluate your departments and current work flow, document our findings, set up a a strategic plan and suggest practical improvements. Our Change Managers will facilitate the change process and support you in streamlining your organisation. Transparency, balance in human resources and **enhanced efficiency** are only a few of the benefits stated by our customers.

Fleet Management Consultancy & Analysis

Objectively analyse your current Fleet Management Operations with MirTac consultancy. Interviews, procedure and document reviews and active participation in your daily practice, are only a few of the tools a consultant may use to analyse and optimise your fleet management. Fleet Management Areas to cover are: Purchasing, Maintenance, Crewing, QHSE, IT, Admin onboard, Logistics. A practical plan of action will ensure **immediate improvements**, efficiency increase and cost reductions.

Interim Management

MirTac is also provider of highly skilled interim management executives in the maritime industry. Our **highly experienced professionals** bring a wealth of experience and expertise to each assignment such as: Project Management, IT Management, Change Management, Financial Management, Crisis Management, Maintenance Management, QHSE Management.

MirTac & Star Information Systems

MirTac is business partner and co-developer of the leading fleet management solution **Star IPS by SIS Marine.** The software is used onboard vessels, maritime offices, assets and rigs worldwide, linking them seamlessly. MirTac will help you assess your needs, optimise procedures, **fill your database with data** and implement and roll-out your fleet management system. Functionality includes purchasing, docking, maintenance, insurance, QHSE, crew management, master cash books, documents, bonded stores, voyages and more..

Star Vessel Administration Module

MirTac develops Star's Vessel Administration Module to comply with internal and external Fleet Administration regulations and requirements. The system supports both office and officers onboard to manage vessel and crew related information.

Crew:	Sign-on/off, certificates, competences, personal effects
Timesheet:	Planning, work & resting hours
Voyages:	Port of Calls including security levels, work done, measures taken
Certificates:	Manage due dates, renewals
Stores:	IMO compliant (bonded) storekeeping
Medicines:	Administrate, monitor, distribute incl. expiry and stock levels
Master Cash:	Cash, radio and item transactions onboard
Daily Journal:	Register daily activities e.g. bunkering, agent onboard
Reports:	IMO Crew lists, passengers, Noon Report

Star: your backbone for Fleet Management

Implementation Services

MirTac will assist you in the whole implementation process. We will help you assess your needs, validate and improve your data and documents, translate your daily practice into the system, set-up a pilot, adjust procedures for implementation, train your staff, and roll-out the solution. In addition, if necessary, MirTac consultants can advise you on how to optimise your fleet management operations to achieve even more efficiency. We support you with:

- **Analysis of Fleet Management Needs**
- **Analysis Documents & Data**
- **Fleet Management Consultancy**
- **Pilot & Adjustment of Project**
- **Implementation**
  - Manage the project during the entire project cycle
  - Plan & allocate the subsequent steps and people
  - Decide on requirements and changes in company procedures
  - Decide on maintenance techniques and logistics
  - Implement your fleet management solution by bringing your daily practice into the solution
  - Implement technical data (Manuals, certificates, ISPS, ISM)
  - Build your database by data collection, data entry and project support
- **Installation**
  - Install and configure PC's and PC Networks as an integral part of a ship's system
  - Install the software in the office and on the vessels
- **Training**
  - Train your project team and other users
- **Maintenance**
  Maintain your system with technical support, helpdesk and long-term database management
