

Star FSM: Fleet Supply Management

Star Fleet Supply Management (Star FSM) represents the next generation software for managing procurement and logistics for shipping and offshore industries. Star FSM utilizes the best of existing technology to offer optimal functionality and efficiency in the purchasing process.

Flexible

Star FSM is built with the newest Star FSM is process driven and software technology and architecture. This gives a high degree of flexibility, and makes it easy to improve and add functionality without a complicated upgrade process.

Configurable

Star FSM can be customized and configured based on your company's set of business rules for:

- User roles
- Approval rights
- **Budget limits**
- Vendor requirements
- **Contract requirements**
- Data exchange •

User friendly

Star FSM's graphical user interface facilitates easy learning, understanding and usage. Application grids and detail layouts can be customized to meet individual preferences.

Efficient

handles the entire purchasing process. Purchasing documents are automatically pushed through the purchase workflow and will only stop for manual intervention when input is required to meet company standards.

Star FSM is designed to reduce manhours in the purchasing process and introduces advanced functionality for quote comparison and document tracking. The compare window makes it easy to compare prices, delivery terms, and shipping costs from the various vendors. Different view options with pre-selections for price, delivery, total cost and currency makes it easy to compare quotes and issue purchase orders.

Use Star FSM to:

- Verify and process requisitions
- Make inquiries
- Evaluate and compare quotes
- Approve purchase orders
- Send purchase orders
- Follow up orders
- Record changes and make change orders
- Organize shipments
- Perform receipt control
- Exchange data with other systems
- Interface to any financial/ accounting package

Integration with other systems

For optimal performance Star FSM is integrated with the Star Information & Planning System (Star IPS) and the SISCommerce e-commerce portal. Star FSM can also be integrated with third party systems such as accounting and invoice scanning and approval.

Technical Data

Star FSM runs on Windows XP/Vista/7 and Windows Server 2003 and 2008. The system supports SQL databases such as Oracle and MS SQL Server.
