

Star Insurance

Star Information Systems AS (SIS) provides fleet management software for ships and rigs. SIS is a

company created by pioneers in the field of fleet management who have been instrumental in the industry since 1967. Since SIS's inception in 1997 we have seen strong growth and today our worldwide network of subsidiaries and agents forms the basis of our customer support.

The SIS systems cover all areas of

- fleet management including: • Maintenance
- Dockings
- Spares and inventory
- Purchasing- including electronic
- commerce
- Safety Management
- Insurance
- and more...

All modules are independent yet can also form a completely integrated system. The SIS software is uniquely designed to make it easier to learn for the people onboard and easier to maintain for the head office.

The software is used onboard and in the office: Coordination occurs through our robust, secure and cost effective data replication engine or on-line features.

The aim of the SIS systems is to improve efficiency and profits through:

- Improved maintenance and condition control
- Manage and follow-up audits, non-conformities, incidents, and near-misses
- Cross fleet comparisons
- Efficient data replication
- Reduced operational costs
- Tighter budget and cost control
- Optimized inventory use
- Efficient purchasing processes
- Reduced risk exposure and reduced insurance premiums

With the Star system managers can be assured of meeting the requirements within their own company and of external parties such as classification societies, national administrations and international organizations.

A dynamic, credible and professional partner for our customers.

Insurance, policies and claims

When it comes to Insurance you don't have a choice: You have to get organized and stay organized.

Star Insurance is the tool that allows you to easily keep track of all information related to policies and claims. It handles every type of insurance policy a shipping or offshore company has including: health, travel, terminals, H&M, P&I, FDD, cargo and COFR.

Star Insurance can be a "stand-alone" program or be fully integrated into <u>STAR IPS</u>, either way it shares Star IPS's easy-to-learn, easy-to-use interface.

When Star Insurance is integrated into STAR IPS "<u>connections</u>" can be made. These "connections" link: <u>Events-Claims-Consequences</u>, and all documents, video clips etc. Giving Star Insurance the ability to leverage all the information in STAR IPS. Linking Star Insurance to the onboard module means that available information will become more accurate and timely

Star Insurance makes it easy to follow up claim estimates, settlements, and costs and reporting capabilities are second to none. You have the option of using STAR's standard reports or ordering "tailor made" reports for your company. Either way you can get excellent statistical and other reports automatically from your database.

For more detailed information please contact sales@sismarine.com / tel: +47 22 47 69 10

Sales Office Stortorvet 5 N0-0155 Oslo, Norway Tel: +47 22 47 69 10 Fax: +47 22 47 69 19 sales@sismarine.com

Star Insurance can be used as a stand-alone program or may form part of the integrated Star Information and Planning System (Star IPS). Star IPS has modules for safety, documents, work planning, docking, crew, budgeting, material and purchase and the messaging capability. (Please refer to the Star IPS brochure for more information)

Data exchange is guaranteed by Star's superlative replication engine.

:Technical Data

Star Insurance can be run on Windows 2000/NT/ XP/Vista workstations. The program uses SQL databases like Oracle and MS SQLServer.
